Set out in the following table is an explanation of each line of the common disclosure template (above). With regard to the regulatory adjustments, banks are required to report deductions from capital as positive numbers and additions to capital as negative numbers. For example, "goodwill" (line 8) should be reported as a positive number, as should "gains" (line 14) due to the change in the bank's credit risk. However, losses due to the change in the bank's credit risk should be reported as a negative number as these are added back in the calculation of Common Equity Tier 1.

1	Common Equity Tier 1 (CET1) entry criteria set out in regulation 38(13)(a) of the Regulations. This should be equal to the sum of common stock (and related surplus only) and other instruments for non-joint stock companies, both of which must meet the common stock criteria. This should be net of treasury stock and other investments in own shares to the extent that these are already derecognised on the balance sheet under the relevant accounting standards. Other paid-in capital elements must be excluded. All
